

A scatter plot illustrating the relationship between the number of species ( $S$ ) on the x-axis and the number of individuals ( $N$ ) on the y-axis. The x-axis ranges from 0 to 100, and the y-axis ranges from 0 to 100. The data points form a dense, curved band starting from the origin and extending towards the top right, with a few outliers at higher  $N$  values.
